CAREER OBJECTIVE

A Financial Technology student at UEH (GPA 3.85/4.0) who thinks in user problems and builds to solve them. Across multiple projects, I have identified pain points, defined requirements, and shipped solutions that cut operational cycle times by 80%, while independently closing a $5,000 global commercial deal. In the next 3 to 5 years, I want to grow into a well-rounded Product Manager who can own high-impact fintech features end-to-end, from strategic product discovery to scalable execution. I see the Product Trainee track at MoMo as the ideal starting point to build this foundation - coordinating cross-functional teams, validating decisions with data, and building products that drive real user engagement and financial access.

EDUCATION

University of Economics Ho Chi Minh City (UEH)
Bachelor of Financial Technology | *Sep 2023 – Present*
Cumulative GPA: 3.85/4.0

- Digital Banking & FinTech: 4.0/4.0
- Design Thinking: 4.0/4.0
- Innovation Management: 4.0/4.0
- Financial Investments: 4.0/4.0

SKILLS

Technical tools • Excel (MOS 1000/1000), SQL, Notion, Figma, Python (Pandas), Supabase (PostgreSQL), n8n (Automation), AI coding agents (Claude Code, Codex, Antigravity)

Core competencies • Product Requirement Definition (PRD), User Stories & UAT, Business Process Mapping (As-Is/To-Be), Partnership & Stakeholder Management, Product Analytics & A/B Testing, Agile/Scrum Framework

WORK EXPERIENCE

GFI RESEARCH
Market Analyst & Partner | Oct 2024 – Feb 2026

- Reduced the daily content production cycle by **80% (5 hours to 1 hour)** - serving 4 distinct audience types (partner, social, KOL, and long-form article) - by designing a configurable content system built on n8n and an LLM style-injection pipeline.
- Grew a personal Web3 research channel to **2.6M+ impressions** on X and Facebook by continuously iterating content formats based on audience engagement data, with quality strong enough that **Mantle Network** (a leading Layer 2 project in Web3 space) discovered and approached the channel organically.
- Independently secured a **$5,000 commercial partnership** with a global **Web3 platform** (Mantle Network) by managing end-to-end stakeholder engagement from initial contact to delivery.

PROJECTS

BROKERZ TERMINAL - STOCK ADVISORY WORKSPACE
Feature Lead & Product Analyst (Group Academic Project) | March 2026 – May 2026

- Ensured **product-to-delivery** alignment by managing feature validation across **4 core modules** and cross-referencing implementation against **product specs.**
- Aligned **product delivery** with user requirements for 3 core features (authentication, Q&A, dashboard) by defining clear user stories, acceptance criteria, and coordinating dev-user feedback loops.
- Caught and documented **usability gaps** by conducting functional testing to ensure actual product behavior matched specifications, acting as the voice of the user.

NOPS LABS - AI VIDEO PROJECT
Workflow Designer | Feb 2026 – May 2026

- Scaled daily video output to **100-200 videos** with zero additional labor, from a 4-step fully manual production process, by leading product scoping, mapping the As-Is workflow, and defining a structured To-Be pipeline spec that the technical team built against.
- Contributed to **infrastructure scoping** for the AI video pipeline by researching and evaluating open-source tools across model APIs, TTS engines, video rendering, and cloud storage, providing the technical team with a consolidated requirements brief.

QUANTITATIVE TRADING MODEL - ATTACKER 2024 (UEL x Yuanta Securities)
Team Leader | Jan 2024 – Apr 2024

- Built a **quantitative, trend-following financial model** in Python using EMA and Bollinger Band indicators to analyze price fluctuations across 50+ screened equities and generate buy/sell signals.
- Managed **portfolio drawdowns and structural transaction risk** by simulating Vietnam's T+2 stock settlement limits and programming stop-loss parameters into the execution logic.
- Ranked **Top 4 of 24 teams** (500+ total participants), achieving a **124.6% simulated return** on HOSE constituents during the backtesting period.

AWARDS & CERTIFICATIONS

A Prize – CTD Academic Research Contest (2025)
B Prize – UEH Academic Research Contest (2025)
Top 4 Finalist – ATTACKER 2024 Algorithmic Trading Contest (UEL / Yuanta Securities)
C Prize – UEH Academic Research Contest (2024)
MOS Associate Certification: Excel (1000/1000), Word (980/1000), PowerPoint (978/1000)
IELTS Academic: 6.5 Band Score
